*Fire Safety for
Adults and
Seniors*

**Boardman Township
Fire Department**

**Bureau of Fire
Prevention
and Education**

Each year approximately 1,100 Americans age 65 and older die as a result of a home fire. Comparing these numbers to the rest of the population:

- ❖ People between 65 and 74 are nearly **TWICE** as likely to die in a fire.
- ❖ People between 75 and 84 are nearly **FOUR** times as likely to die in a fire.
- ❖ People 85 and older are more than **FIVE** times as likely to die in a fire.

Following a few fire safety tips, adults and seniors can dramatically reduce their risk of injury or death from a fire.

The Boardman Fire Department Bureau of Fire Prevention and Education would like to announce our support and cooperation with the U.S. Fire Administration (USFA), a division of the Federal Emergency Management Agency (FEMA), in developing a fire safety program for adults and seniors in the community.

The intent of the program is to review the steps required to make homes fire safe and remind people of fire safe behaviors.

The program offered by the Boardman Fire Department will be tailored to meet the needs of your group or organization. The program includes a power-point presentation to help reinforce the information.

Items that will be covered will include:

- Cooking safety
- Heaters and fireplaces
- Smoking
- Electrical safety
- Smoke detectors and fire extinguishers
- Carbon monoxide
- Question and answer session

If you would like to schedule a fire safety lecture or just want some more information please contact the **Bureau of Fire Prevention and Education at 330.729.9535.**
