

FUNDING

The funding for the Mobile Safety Classroom was received from a federal grant from the Federal Emergency Management Agency (FEMA). The graphics on the trailer were designed by Boardman art students.

Mobile Fire Safety Classroom

**Boardman Township
Fire Department**

**Bureau of Fire Prevention
and Education**

The **Mobile Fire Safety Classroom** is our 33 foot travel trailer that is designed to educate people about safety. The trailer allows us to teach adults and children about safety in a setting that replicates the home environment. The trailer includes:

- ❖ Living room
- ❖ Kitchen
- ❖ Two bedrooms
- ❖ Bathroom
- ❖ Control room

Each area has different safety lessons that can be taught.

- ❖ Kitchen
 - Safe cooking practices
 - Extinguishing a cooking fire
 - Water and electrical safety
- ❖ Living room
 - Exiting from a building
 - Smoke detector activation
 - Fire alarm activation
 - Calling 911
 - Fireplace safety

- ❖ Bedrooms
 - Crawl low under smoke
 - Feel the door for heat
 - Know 2 ways out
 - Exiting out of a window
- ❖ Control room
 - Able to place non-toxic smoke into each room
 - Monitor a closed circuit TV
 - Answer 911 phone

The living areas of the trailer can be filled with a non-toxic, non-staining smoke that activates smoke detectors and teaches children the path that smoke takes and how to crawl low and find “good air”. The children can then crawl to a door that is heated to simulate a fire on the other side. A window equipped with a fire safety ladder can then be used to escape.

Other Services Offered by your Boardman Fire Department
